URL: <http://catalog.data.gov/dataset/youth-behavior-risk-survey>

Description: This dataset shows how the survey is meant to monitor health risks that contribute to causes of death, morbidity, and social problems among the youth of New York City. The Dataset records these risks pertaining to smoking and alcohol use.

Survey: The survey used to record the data AKA Youth Behavior Risk Survey

Year: when the survey was taken

Prevalence: How relevant are the categories to the survey takers life/ how affected are they by the categories being surveyed.

Smoked at least once past 30 days: The average of how many times the person smoked within 30 days of the survey

Binge Drinking in past 30 days: How many times a person experienced binge drinking within the 30 days before the survey.

Drank five or more alcoholic drinks in a row in past 30 days: Similar to the binge drinking column but alcohol. How many times a person drank more than 5 alcoholic beverages within the 30 days leading up to the survey

Got help from a counselor in past 12 months: How many sought out help for these issues within a year before the survey.

Drinks 1 or more sodas per day in past 7 days: How many sodas they drink over one a day for a week

Adolescent obesity: How many kids experienced obesity that took the survey in that year

Physically Active 60 minutes per day: How many kids that took the survey in that year and social class are active for 60 minutes.
